

ISIS™ inSIGHT™ DIAGNOSTIC MODULE

DESCRIPTION

Whether you've got your ISIS kit installed or you're just starting the process you'll want to make sure that you have our inSIGHT™ diagnostic module running. It's the easy way for you to ensure that your ISIS electrical system is functioning normal and that all electrical connections are intact.

The ISIS intelligent multiplexed system is all about simplicity from start to finish. Whether you've got your ISIS kit installed or you're just starting the process you'll want to make sure that you use our diagnostic module (New standard with all 2-CELL and 3-CELL kits).

MODULE FEATURES:

- Simple plug and play installation means you can spend your valuable time testing the electrical system instead of programming a diagnostic tool
- 4-line, 16 character back-lit, high-intensity blue display is easy to read in all light conditions
- Allows for simple diagnostics and troubleshooting of system install.
- Instant indication of input command functionality allows for quick testing of electrical functions for both wired and wireless inputs.
- Real-time monitoring of critical parameters for all cells in the system gives you continuous access to automobile electrical system status. (Battery voltage, charge-pump voltage, power control unit temperatures, output status)

KIT INCLUDES:

- ISIS inSIGHT™ System Diagnostic Module
- 4 – mounting screws with stand-offs
- 4 – Additional buttons
- 1 – Replacement vinyl label for case
- Installation guide
